

## Submit Your Best Science: ISHLT Accepting Abstracts for its 2022 Annual Meeting

*Abstracts welcomed from researchers, clinicians, and junior faculty across the entire care team.*

**ADDISON, Texas – 8 September, 2021** – The International Society for Heart and Lung Transplantation (ISHLT) has opened abstract submissions for its [42<sup>nd</sup> Annual Meeting & Scientific Sessions on 27-30 April, 2022](#). This event will include in-person and virtual elements and feature educational content spanning the breadth of clinical practice and research concerning heart and lung transplantation, advanced heart and lung disease, mechanical circulatory support, and pulmonary vascular disease.

“The ISHLT Annual Meeting and Scientific Sessions feature world class research and contemporary topics in advanced heart and lung disease and thoracic transplant,” says **Laurie Snyder, MD, MHS, ISHLT 2022 Scientific Program Chair**. “The meeting will bring together providers at all stages of their careers and from around the world in a collaborative and engaging environment. For the first time in three years, we will offer an in-person meeting venue in addition to the opportunity to engage virtually.”

Abstract submissions are accepted in three areas: **Research Abstracts, Early Career Clinical Case Reports,** and **Late-Breaking Clinical Science**. The ISHLT welcomes submissions from all specialists engaged in treating advanced heart and lung disease, particularly those working on novel therapies. ISHLT2022 will feature some of the most ground-breaking investigative studies, including sessions on COVID-19.

“The ISHLT Annual Meeting is an opportunity for networking with colleagues from around the globe,” says **Lara Danziger-Isakov, MD, MPH, ISHLT President**. “ISHLT2022 provides education for a broad multidisciplinary range of attendees to enhance our knowledge and improve the care of our patients. We invite clinicians and researchers around the world to respond to the Call for Abstracts and share their work internationally among the world’s most influential professionals in the field of end-stage heart and lung failure and transplantation.”
